Incumbency vs. Estimated Availability Report

The Incumbency vs. Estimated Availability Report shows potential areas of underutilization of people of color and women by job group. It compares the percentage of people of color and women employed on 1/1/2022 to the estimated percentage of people of color and women available for each job group. If Employment is less than Availability, the Availability percentage becomes the Placement Goal for next year.

S - Significant Difference Rule

Shortfall

A placement goal is set when employment is less than availability by a statistically significant amount.

* When a group tests as a small group according to the Rule of Nines, an alternate rule is used instead of the Significant Difference Rule.

Adverse Impact Report for Applicants

The Adverse Impact Report for Applicants helps to identify potential problem areas in the selection rates of applicants. Using the four-fifths rule (also called the 80% rule), the selection rate of applicants from each non-favored group is compared with the selection rate from the favored group. A selection rate for any group that is less than four-fifths (or 80%) of the rate for the group with the highest selection rate is an indication that hiring practices had an adverse impact on that group. Differences in selection rates that are not statistically significant are highlighted in yellow and those that are statistically significant are highlighted in red.
