

PROSPER PORTLAND

FY2016-17 through FY2020-21 5-YEAR EXPENDITURES

BUREAU NOTES

Prosper Portland 5-Year Expenditures

Overview

Prosper Portland's resources are primarily made up of tax increment financing (TIF) within 16 districts. TIF is a tool used in districts that dedicates future tax revenues to pay for current revitalization efforts. This tool is the primary source of funding for Prosper Portland, a component of City government formed by voters in 1958 as the City's urban renewal agency.

TIF districts are geographically focused: tax revenue growth within a certain boundary is dedicated for investment within that same area. TIF district boundaries are adopted by the Prosper Portland Commission and City Council.

Allocation Methodology

There are 16 TIF districts displayed for the reporting time period; many cross financial planning districts. For this mapping exercise, tax increment project and programmatic investments made in the last five years (FY 2016-17 through FY 2020-21) are shown in total. Prosper Portland also has a limited amount of funds that can be used citywide for economic development activities including traded sector business development, workforce development, small business technical assistance, and neighborhood prosperity initiatives.

Map Discussion

Central City reports the highest spending largely due to the maturity and financial capacity of Central City TIF districts, such as River District. Neighborhood districts such as Lents and Interstate show spending based on growing financial capacity and growing investments. Other Neighborhood districts such as Gateway and those in the Neighborhood Prosperity Network (NPN) show lower spending based on lower relative assessed value and the emergence of the NPN as new districts. Looking forward, Prosper Portland anticipates spending to increase in the Neighborhoods as Neighborhood districts mature and significant, planned project and program investment occurs over the next five years.
