

Welcome to the new AssetWorks managed fuel terminal!

The terminal, now called Island Control Units or ICUs, will look different, but work the same way. If you entered odometer readings in the old terminal, please enter them in the new ICU, otherwise insert the fuel nozzle into the fuel inlet as you normally would.

How to Enter Pin containing a leading zero?

1. When entering your employee fuel PIN number, do not enter any leading zeros
2. For example, if your pin in EJ Ward was 0009, then your pin in AssetWorks FuelFocus is 9
3. If your pin in EJ Ward was 0090, then your pin in AssetWorks FuelFocus is 90
4. If your pin in EJ Ward was 0900, then your pin in AssetWorks FuelFocus is 900

Having trouble dispensing fuel at the new ICU?

Call the City Fleet Technology team at **503-823-3103** for assistance.
