- **Barbara Bochinski Portland Copwatch** (18:08:45): Barbara Bochinski, She/her, Portland Copwatch
- **barb. rainish (she/her)** (18:11:48): Hi Everyone! Barb. Rainish she/her Community Member, PCCEP groupie, member of the PPB BHUAC ( Behavioral Health Unit Advisory Committee). I look forward to meeting new PCCEP members in person.
- **dan handelman he/him** (18:23:48): The demographic data don't change enough to explain the percentage of Black people stopped by the PPB. If you ran the same chart for population as you do for difference between crash data and crime victimization there would be little significant difference. Portland Copwatch concedes that the crash data give a better idea of who's driving, but the crime victimization data make no sense to use, nor does the claim about people coming in from other parts of the metro area. (I'll say this in Q&A but I'm finding it very frustrating to listen to this presentation).
- **dan handelman he/him** (18:33:43): This is what I mean by my earlier comment- because someone lives in that area doesn't imply they gave the officers a reason to pull them over. They are being pulled over because they are driving. So the driving population is what matters.
- **dan handelman he/him** (18:50:55): six of sixteen?
- **dan handelman he/him** (18:51:11): Six OR sixteen consent searches?>

- **Robin Wisner PCCEP Member** (19:57:14): Thank you Barb
- **dan handelman he/him** (19:57:21): Speaking of the COCL report, I wrote to PCCEP staff, "The COCL website gives the comments due date as November 13, this email gives the date as November 9, but the 30 days required by the Settlement Agreement would

imply comments should be due on November 17 (30 days after it was posted” and they said the date is November 13, but didn’t address that doesn’t give the community a full 30 days to respond.

- **PCCEP Portland** (19:57:29): We do link all relevant meeting materials at the PCCEP event pages for meetings a week beforehand. For instance, you will note that the Stops Data report was linked here
