

PPB Force Analysis Summary Report

Q3 2021

July 01 - September 30, 2021

Prepared by
Office of the Inspector General
November 2021

Executive Summary

- Officers initiated 11,829 calls for service in Q3 2021. These calls resulted in the use of force 0.28% of the time. Of these officer-initiated calls, 18 resulted in a use of Category II-III force (0.15%), and 15 resulted in a use of Category IV force (0.13%).
- Citizens initiated 63,931 calls for service in Q3 2021. These calls resulted in a use of force 0.25% of the time. Of these citizen-initiated calls, 81 resulted in a Category II-III force (0.13%) and 77 resulted in Category IV force (0.12%).
- Of the 2,979 custodies in Q3 2021, 6.41% resulted in a use of force. Category II-III force accounts for about 3.32% of custodies, and Category IV accounts for 3.12% of custodies.
- When compared to Q2 2021, the number of force cases decreased by 7%, calls for service increased by 1%, and custodies decreased by 2%.
- Fifty-eight percent of the use of force applications were resisted handcuffing (27%) and control against resistance (32%).
- Subjects in mental health crisis accounted for 19% of subjects involved in force incidents. Over half (62%) of the applications of force used against subjects in a mental health crisis were the lowest level of reportable force (control against resistance 37%; resisted handcuffing 25%).
- For subjects involved in force incidents:
 - 36% were armed
 - 45% were drug and/or alcohol affected

Force Facts Q3 2021	
Number of cases involving force	190
Number of individuals involved in force incidents	191
Number of officers involved in force incidents	244
Total Force Data Collection Reports (FDCRs) written	429

Table 1.1: Force types under new 1010.00 policy

**New force types shown in red*

(Control) Holds with Injury	K9 Bite
Aerosol Restraint	Less Lethal
Baton (Nonstrike)	Less Lethal - Aggressive Animal
Box-in	P.I.T.
CEW	Pointing of a Firearm
Control Against Resistance	Resisted Handcuffing
Controlled Takedown	Strikes/kicks
Firearm discharge to end the suffering of a wounded animal	Takedown
Firearm discharge to stop an aggressive animal	Vehicle Ram
Hobble Restraint	
Impact Weapons	

PPB Force Analysis Summary Report

Prepared By: Office of the Inspector General

Dates Covered: July 1, 2021 - September 30, 2021

Force Facts:

Number of cases involving force	190
Number of individuals involved in force incidents	191
Number of officers involved in force incidents	244
Total Force Data Collection Reports (FDCRs) written	429

Subjects of Uses of Force

PPB Force Analysis - Out of Policy Cases

Prepared By: Office of the Inspector General

Dates Covered: July 1, 2021 - September 30, 2021

Out of Policy Cases

Case	Force Type(s)	Type of Arrest	Type of Event	Number of Officers Who Used Force	Number of Out of Policy Officers	Number of Involved Subjects
1	Takedown-dynamic, Resisted Handcuffing, Strikes/Kicks, Control Against Resistance	Arrest-Felony	Dispatched	2	1	1
Out of policy: 1010.3.1. Unless it would present a danger to the member(s) or others, members shall issue a clear and intelligible verbal warning or attempt to utilize hand signals where there is a language barrier or the subject is deaf or hard of hearing, prior to using any force.						

PPB Force Analysis Summary Report - Deadly Use of Force and Crowd Control

Prepared By: Office of the Inspector General

Dates Covered: July 1, 2021 - September 30, 2021

Deadly Use of Force:

Deadly Use of Force - Q3 2021		
Date	Subject Demographics	Fatal/Non-Fatal
7/20/2021	White, Male	Non-Fatal
9/12/2021	White, Male	Non-Fatal
8/27/2021	White, Male	Fatal

Crowd Control Force Facts:

Event Name	Date	Force Application Count Type	Aerosol Restraint	Baton - Nonstrike	Baton - Strike	Box-In	Chemical Agent - CS	Chemical Agent - OC	Control Against Resistance	Hobble	Launchable Impact - 40mm Sponge	Launchable Impact - FN303	Launchable Impact - Marking	Launchable Impact - RBDD	P.I.T.	RAM	Resisted Handcuffing	Sound Light Dist. Device	Strikes/Kicks	Takedown	Takedown - Controlled	Minimum # of Applications*
------------	------	------------------------------	-------------------	-------------------	----------------	--------	---------------------	---------------------	----------------------------	--------	---------------------------------	---------------------------	-----------------------------	--------------------------	--------	-----	----------------------	--------------------------	---------------	----------	-----------------------	----------------------------

No force was used at crowd control events during Q3 2021

* Number of FDCRs by Count Type: Estimated vs. Actual

When an officer identified an exact number of applications for each force type, the count type was considered an actual count. When an officer did not identify a concrete number of applications for each force type used on their FDCR, the following methodology was applied:

- If an officer provided a numerical estimate (for example, "I pushed a person 3-5 times with my baton"), then this force type was counted using the highest number of the estimate (5 in this example) and considered an actual count.
- If no clear estimate was given (for example, "I pushed multiple persons at multiple locations with my baton throughout the night"), then this force type was counted as one application and considered an estimated count.

The Force Application Count Type is counted per FDCR, not force type.

For the description of the force types listed above, please see the Definitions section of this report and Directive 1010.00. In addition, the following methodology was used for crowd control specific force types:

FN303 Pava/OC Powder 40mm rounds used as an area denial tool were counted as Chemical Agent – OC; Inert RBDD's were counted as Control Against Resistance; Baton/hand used to push an individual who resisted the officer's efforts was counted as Control Against Resistance; Baton/hand used to push an individual that resulted in the individual falling to the ground was counted as Takedown; Each canister was counted for Chemical Agent-CS/Chemical Agent-OC applications.

The following were not considered an application of force: inert smoke canister, smoke SKAT round, baton/hand used to guide an individual who demonstrated no resistance to the officer's efforts.

Portland Police Bureau Strategic Services Division

Arrests made by the Portland Police Bureau in connection to a protest or demonstration

July 1, 2021 to September 30, 2021

Distinct Arrests	2
Distinct People	2

Distinct Arrests includes the total number of arrest bookings (one person per one arrest).

Distinct People includes the distinct number of people that were arrested during the time frame (one person can have multiple arrests).

Arrests by Race and Gender

This table represents that total number of *distinct arrests* for a given race and gender.

An individual with multiple arrests during the quarter will be counted multiple times (once for each arrest).

	White	Black/African American	Hispanic or Latino	Native American or Alaskan Native	Asian	Total Arrests
Male	2	0	0	0	0	2
Female	0	0	0	0	0	0
Total Arrests	2	0	0	0	0	2

Data Notes:

- The statistics only include arrests made by PPB where an Arrest Booking report was completed in RegJIN. **Arrests made by OSP, MCSO or a Federal Agency are not included in the above stats.**
- The arrests are being counted by the "arrest date." In most cases, the arrest occurs on the same date of the demonstration (or the next morning). However, there are arrests that can result from an investigation. These arrests are being counted on the date of the arrest and not the demonstration date (which can be days/weeks earlier). **These statistics include arrests made between July 1, 2021 and September 30, 2021.**
- The statistics include: arrests linked to a case with a demonstration/protest/riot offense code, reference a protest in the arrest summary or were mentioned in a press release. These statistics might vary slightly from the total number of arrests in the press releases due to some arrests not being known at the time of press release or occurring as a result of an investigation.
- The statistics include citations-in-lieu of arrest where an arrest booking was written in RegJIN but a jail booking never occurred. Due to data quality issues it is not possible to differentiate citations-in-lieu of arrests from other arrests.
- Arrest statistics also include individuals under 18 years of age at the time of arrest (juveniles).

PPB Force Analysis Report - Subject in Mental Health Crisis

Prepared By: Office of the Inspector General

Dates Covered: July 01, 2021 - September 30, 2021

Subjects of Uses of Force

36

Control Against Resistance	122	34%	Pointing of a Firearm	11	3%
Firearm - Animal (aggressive)	0	0%	RAM	0	0%
Firearm - Animal (suffering)	0	0%	Resisted Handcuffing	99	28%
Holds with Injury	0	0%	Strikes/Kicks	8	2%
			Takedown	42	12%
			Takedown - Controlled	13	4%

Beginning August 19, 2017, PPB began reporting the following 10 force types: *Baton - nonstrike, Takedown - controlled, Resisted Handcuffing, Hobble Restraint, Firearm - Animal (suffering), Firearm - Animal (Aggressive), Box-in, Control Against Resistance, P.I.T., and Vehicle Ramming.*

On January 19, 2020, *Less Lethal to stop an aggressive animal* was added. These force types are listed in *red font* in the above tables.

Figures detailed in this report are not comparable to reports published prior to August 19, 2017.

*In this quarter, CEW was applied to nine transient subjects. One subject received three or more CEW Cycles.

Portland Police Bureau Applications of Force 2021-Q3

Note: This data does not include crowd control or deadly force events.

PPB Force Analysis Report - Drug/Alcohol Affected Subjects

Prepared By: Office of the Inspector General

Dates Covered: July 01, 2021 - September 30, 2021

Subjects of Uses of Force

86

Asian	Female	1	1%	Hispanic	Male	7	8%

Total	17	7	26	25	62

*Persons may have more than one type of force used against them and may be armed with more than one type of weapon.

Non-Category IV Force

Control Holds with Injury	A control hold with injury event occurs when a member applies physical control to a person and an injury results. The physical control may not have caused the injury but an FDCR will be completed and a force investigation will occur.
Takedown	A takedown occurs when a member moves a subject from an upright position to the ground by applying some amount of force. It is not a takedown if the subject goes to the ground under their own power.
Strikes/Kicks	Strikes/Kicks events occur when a member uses their hands, elbow, knees or feet to strike a subject as an application of force. These are different events from strikes with a baton, which are captured in the "Impact Weapon" category.
Impact Weapon	Uses of a baton or a less lethal shotgun are considered the use of an impact weapon. A baton-impact weapon event occurs when an officer strikes a subject with a baton. A less lethal impact weapon event occurs when a member fires less lethal impact munition at a subject, whether the subject is struck or not.
Aerosol Restraint	An aerosol restraint event occurs when a member uses pepper spray on a person.
CEW	A CEW (Conducted Electrical Weapon) event occurs when a member deploys the CEW to a subject in probe or drive stun mode. CEW uses are counted whether they were effective applications or not.
K-9 Bite	A K-9 bite occurs when a K-9 is deployed and delivers a bite to a subject.
Maximum Restraint	Maximum restraint was discontinued as an approved use of force in April 2015. Numbers are as follows: Hobble: Q1 2014-16, Q2 2014-13; Maximum Restraint: Q3 2014-9, Q4 2014-8, Q1 2015-5, and Q2 2015-1.

Category IV Force¹

Boxing In	Boxing-in is a coordinated tactic of positioning police vehicles around a subject's vehicle to stop or prevent the start of a pursuit. When a member performs a Box- in, the driver of the vehicle is considered the subject of the force event.
Baton – non-striking	Non-Striking use of the baton includes the use of the baton as a pry tool.
Controlled Takedown	A controlled takedown is defined as a takedown performed in a completely controlled manner where there is minimal resistance and no injury.
Response to Resisted Handcuffing	Resisted handcuffing is handcuffing that occurs while a subject is resisting, this includes a subject tensing up, or any resistance that requires a member to push the subject's hands together for handcuffing.

Pointing of Firearm	A pointing of a firearm event occurs when a member points a firearm at a subject. This includes handguns, lethal shotguns and rifles. This does not include pointing a CEW or less lethal launcher at a subject.
Hobble Restraint	A hobble restraint is used to control a subject beyond the capability of handcuffs. It is used to secure a combative subject's legs together to prevent kicking. A hobble may also be used on the upper arms and legs of a subject, if the subject has demonstrated the intent to slip their handcuffs to the front.
Control against Resistance	Control against resistance refers to a member's use of physical contact to restrain a struggling individual.
Firearm Discharge – End the suffering of an injured animal	A member may discharge their firearm to end the suffering of a critically injured animal.
Less Lethal – Aggressive Animal	Use of a less lethal weapon (impact munitions, aerosol restraint, or CEW) to stop an aggressive animal.
For additional definition of Force Categories, please refer to Portland Police Bureau Directive 1010.00	

Measurement Definitions

Individuals Involved in FDCR Force Events	This captures the number of people against whom force was used. If a person has force used against them during more than one force event over the span of the quarter, that person is counted for each time force was used against them. For example, a person having a firearm pointed at them in June and again in July would be counted as two individuals involved in force events in this category.
Total Force Data Collection Reports (FDCRs) Written	When a member uses force reportable on a Force Data Collection Report (FDCR), the member must complete an FDCR. This category captures the number of FDCRs written by members within the quarter of analysis. An FDCR can report more than one type of force used against a single person. This accounts for the difference seen between the number of FDCRs written and the Force Documented on FDCR. One FDCR may contain more than one type of force. For example, an officer who used a strike and a takedown would complete a single FDCR reflecting that both force types were used.
Number of Cases Involving FDCR Force	This is the total number of unique cases (identified by case number) that included an FDCR-level force event. Multiple subjects within the same case may have had force used against them, but the case will only be counted once.
Number of Officers Involved in FDCR Force Incidents	This is the total number of unique officers who reported FDCR-level force during the quarter. Officers may have used force in more than one incident, but are only counted once in this figure.
Subjects of Uses of Force	This is the demographic information (race and gender) of the subjects against whom force was

	used. This is counted the same way as Individuals involved in FDCR Force Events (see above).
Undetermined Individuals	Reflects force that was used against a person whose identity and demographic information was unable to be determined. This occurs most often in protest settings and vehicle pursuits where the dynamics of the event prevent the capture of the person against whom force was used.
Applications of Force	Reflects the total number of times a specific force type was used. Previous reports indicated the aggregate number of times each type of force was reported on an FDCR. This figure represents the number of applications delivered of each force type. Ex: if officer A applied two strikes and officer B applied two strikes, it would be captured as four strikes total , rather than two uses of strikes.
Force Type Demographics	<p>This table reflects the number of times a specific force type was applied to individuals of various demographics. It reflects the aggregate number of uses of each force type on individuals of that race/gender, rather than the number of force applications.</p> <p>Ex: if officer A delivered three strikes to one white male during an incident, it would be counted as one on this table.</p>
Subjects of Force to Custody Ratio	This is the total of Subjects of Uses of Force divided by the total number of custodies. Please see Subjects of Uses of Force and Total PPB Custodies definitions for further information.
Subjects of Force Without Custody	<p>This is the total of the number of people who were the subject of the application of force and were not taken into custody.</p> <p>Generally these incidents include; disengagement after a force event, passengers (with unproven criminal culpability) in high-risk traffic stops, protestors, when officers are unable to make arrests due to crowd size or other factors , subjects detained and released as a consequence of mistaken identity or when probable cause dissipates through the officer's investigation.</p>
Total PPB Custodies	<p>This captures each unique custody per subject and includes the following categories:</p> <ul style="list-style-type: none"> • Arrests (felony and misdemeanor) • Transports to detox • Transports to hospitals • Transports to mental health facilities • Protective Custodies <p>Additionally the demographic information (race and gender) of the subject taken into custody is also captured here. This data is used for benchmarking non-deadly use of force dataⁱ.</p>
Calls for Service / Initial Call Type / Citizen Initiated and Officer Initiated Calls	This data is provided by the Bureau of Emergency Communication (BOEC), it provides the number of calls that officers responded to within the quarter of

	<p>analysis. The initial call (code) type assigned by BOEC is used when determining the Top 10 Initial Call Types.</p> <p>Citizen initiated calls are those that citizens call-in to dispatch and are assigned a priority level, (1-9) by dispatch (BOEC). Priority 1 calls are the most urgent and priority 9 calls are the lowest priority.</p> <p>Officer initiated calls are those incidents where the officer takes action based on independent observations or information obtained from locations other than BOEC, such as being alerted to crime by a citizen or a vehicle stop for a traffic violation.</p>
FDCRs Written and Officer Precinct	This captures the precinct of assignment for each officer who applied force at the time of the force event. It is counted for each FDCR written.
% of Subjects to Whom a Specific Type of Force was Applied	This is the ratio of the total number of people against whom a specific type of force was applied divided by the total number of individual people against whom force was applied during the review period.
Subject in Mental Health Crisis	This is a total of the people against whom a specific type of force was applied that were identified as being in a mental health crisis at the time of the incident. A mental health crisis is defined as when someone with an actual or perceived mental illness experiences intense feelings of personal distress, thought disorder, obvious changes in functioning, and/or catastrophic life events which may, but not necessarily, result in an upward trajectory of intensity culminating in thoughts or acts that are dangerous to self and/or others.
Rate of Force	This statistic, rate of force, is the total for each type of force, as reported on the FDCR, divided by the total number of unique subjects for the quarter of analysis. This number is reported for each force type and by specific subject demographics in the Types of Force sections of this document.
Taser Over 2 Cycles	<p>This includes the number of times a single subject had three or more Taser cycles applied to them. This includes ineffective Taser cycles and does not distinguish the application of the Taser cycle by officer, rather this number is cumulative.</p> <p>A Taser cycle occurs when an officer pulls the trigger of the Taser and delivers energy to a person for duration of up to five (5) seconds. Each additional delivery of energy for five (5) seconds or fraction thereof, is a unique cycle and requires justification by the operator. For example, an application that lasts just one second is one cycle. A subsequent, two second application is a second cycle. An application that lasts six seconds is counted as two cycles.</p>

K9 Cover	A call where the K9 handler is sent on a call to use the dog as an asset, but the dog is not deployed. Example: A high risk traffic stop where the dog is ready to apprehend a fleeing person if needed.
K9 Application	A call where the dog is deployed to be used as a locating, clearing, or apprehension tool.
K9 Capture	A call where the dog is deployed and a suspect is taken into custody based on the use of the dog.
K9 Bite	A call where the dog is sent to bite and apprehend the person at the direction of the handler. This number does not include instances where the dog is sent to bite and apprehend a person but is called off because the person surrenders before the dog reaches them.
Transient	Subjects listed as “Transient” at the time force was used are counted in this category. This category may include subjects who have refused to identify a residence. Because housing is fluid for this population, subjects may be counted who were previously transient but are no longer transient, and vice versa.
Subject Under the Influence of Drugs/Alcohol	Number of <i>unique</i> subjects who were documented as under the influence of either/both drugs/alcohol, or in possession of drugs.

ⁱ Non-deadly use of force is a potential outcome of a custody event, in that if a person resists being taken into custody, an officer may use force to overcome the person's resistance to affect the custody. Because non-deadly use of force is an outcome of an overall custody event, the Portland Police Bureau (PPB) uses custody data as the benchmark statistic for non-deadly use of force data, for example the rate of non-deadly force incidents to custodies found in this report. The demographics represented in the overall custody population are the most accurate population to compare to the non-deadly use of force demographic data for benchmarking. The PPB does not use census data (<https://www.census.gov/>) for benchmarking the custody data provided in this report due to the following:

- Because census data is explicitly focused on the residential population in the observed jurisdiction, it is an inaccurate representation of the large number of persons who visit, work, or commute through Portland e.g., the custody jurisdiction.
- Census underrepresents vulnerable populations such as houseless/transient and unsheltered individuals. People of color, especially Black / African Americans, are disproportionately more likely to experience homelessness than White individuals. Any benchmark that strictly utilizes census data is likely undercounting the Black / African American resident population in Portland. Historically, persons experiencing homelessness have been underrepresented in the decennial census.
- Utilizing census data as a population benchmark also fails to account for the differential risk of arrest, involvement in criminal activity, criminal convictions, and crime victimization experienced by persons in the custody jurisdiction. In contrast, custody data includes solely persons who engage in criminal behavior, or who are taken into custody for non-criminal reasons.
