Land Use Review Proposal	_____

Applicant's Name _____ Phone _____

Mailing Address _____

Adequate water and safe access to a proposed site is required prior to issuance of a building permit or approval of a Land Use Review. These requirements ensure that fire protection equipment can reach the site and that water is available during the construction phase and after the occupancy of the structure. Take this form to the Fire District that serves the property, along with a site plan of the development. After the fire official signs the form, please include the completed form with your application.

TO BE COMPLETED BY A FIRE DISTRICT OFFICIAL

Existing access to the proposed development is adequate.
 Access improvements will be required.

The following improvements must be completed prior to permit issuance: _____

A re-inspection must occur prior to occupancy.

There is adequate water pressure and flow for fire fighting purposes: Yes No
 Source _____
 Pressure _____
