

DATED JUNE 22, 2020

### Idle Reduction Requirements

Beginning January 1, 2020 contractors working on [agency] construction projects shall take the following steps to reduce unnecessary diesel equipment idling:

- All nonroad diesel equipment must shut down after five (5) minutes of inactivity, and
- All nonroad diesel equipment shall have decals/prompts visible to the operator to remind them to shut down the equipment after five (5) minutes of inactivity, and
- Contractors will ensure all diesel equipment operators are aware of the policy, and
- Contractors will post “Five Minute Limit” signs in high foot traffic areas of the job site, visible to workers.

Exemptions to the above idle reduction requirements are allowed in circumstances where:

- the safety of contractors and their employees may be compromised if diesel equipment is turned off; for example, where employees are working in a trench; or
- the equipment meets the most stringent EPA emissions standards or has been retrofit with a DPF; or
- frequent shutdowns may be detrimental to the exhaust control system, reducing the effectiveness of that system by lowering the exhaust temperature; or
- equipment requires testing, servicing, inspection, or repairs.

### Diesel Engine Requirements and Phase-In Schedule

Effective January 1, 2022 and in accordance with the phase-in schedule outlined below all diesel-powered nonroad construction equipment greater than 25 horsepower and all on-road diesel dump trucks and concrete mixers used on [agency] construction projects must meet the following requirements. When pursuing diesel emission control device retrofits, equipment and vehicle owners shall install the emission control device that maximizes diesel particulate matter reductions for that specific piece of equipment or vehicle in accordance with the Compliance Options Protocols.

Effective Date of Diesel Engine Requirement	Nonroad Diesel (over 25hp)				On-Road Diesel (concrete mixers and dump trucks)		
	Engine Requirements	Retrofit Options			Engine Requirements	Retrofit Options	
		DPF	DOC (only if DPF or equivalent can't be installed)			DPF	DOC (only if DPF or equivalent can't be installed)
		All Firms	Non-DMWESB/SDVB Firms	DMWESB/SDVB Firms	All Firms	Non-DMWESB/SDVB Firms	DMWESB/SDVB Firms
January 1, 2020	No Idling						
January 1, 2021							
January 1, 2022	No Tier 0 engines allowed unless retrofit	Y	Y	Y			
January 1, 2023	No Tier 0 or 1 engines allowed unless retrofit	Y	Y	Y			
January 1, 2024	No Tier 0, 1, 2, or 3 engines allowed unless retrofit	Y	N (pre-2024 installs allowed)	N (pre-2024 installs allowed)	No pre-2007 engines allowed unless retrofit	Y	N (pre-2024 installs allowed)
January 1, 2025			N				

Contractors may apply for exemptions to the above diesel engine requirements on a per project basis in circumstances where:

- The equipment/vehicle is required for an emergency (including for underground equipment operators).
- After following the Compliance Options Protocol, the required emission control device would obscure operator lines of sight or otherwise impact worker safety or the equipment is not able to be retrofit with an emission control device; and no compliant rental equipment is available within 100 miles of the job site.
- After following the Compliance Options Protocol, the contractor can demonstrate that due to the uniqueness of the equipment/vehicle or similar special circumstances, it is not reasonable to comply with the diesel engine requirement for a specific piece of equipment/vehicle.

### Compliance and Verification

Contractors (prime and sub-contractors, and applicable suppliers) will demonstrate compliance with the Clean Air Construction Standard on an annual basis by providing to the [agency], or approved program operator, all requested diesel equipment/vehicle information needed to verify compliance, including confirmation that retrofit devices are maintained on the equipment in proper operating condition.

Upon determining compliance with the requirements, the [agency], or approved program operator, will issue an equipment/vehicle decal for each compliant piece of equipment/vehicle. This decal must be displayed on the compliant equipment/vehicle at all times in a location readily visible to [agency] staff. In addition, random on-site inspections by [agency] staff (or approved program operator) will be conducted on a project by project basis.

### Compliance Options Protocols

Compliance with the Diesel Engine Requirements contained herein will be determined according to the following protocols:

#### NONROAD Compliance Options Protocol

Protocol Step	Question(s)	Answer	Action
1	Is the nonroad equipment over 25hp?	YES	Go to Step 2
		NO	Register equipment and obtain compliance verification. No further action required other than anti-idling compliance on job-site.
2	Is the equipment required for an emergency? (including for underground equipment operators)	YES	Request Exemption
		NO	Go to Step 3
3	Is the equipment powered by electricity or alternative (non-diesel) fuel?	YES	Register equipment and obtain compliance verification. No further action required other than anti-idling compliance on job-site.
	Does the diesel equipment utilize only a Tier 4 engine(s)?	NO	Go to Step 4
4	Can the equipment be repowered or retrofit with a CARB or EPA verified DPF or equivalent? <sup>1</sup>	YES	Repower or retrofit equipment and obtain compliance verification.
		NO	If it is currently 2023 or earlier, go to Step 5 If it is currently 2024 or later, go to Step 6.
5 (pre-2024)	Can the equipment be retrofit with an emissions control device other than DPF?	YES	Retrofit equipment with an emission control device that maximizes diesel particulate matter emission reduction. Obtain compliance verification.
		NO	Go to Step 6

6	Is compliant rental equipment available within 100 miles of the job site?	YES	Rent equipment and obtain compliance verification.
		NO	Request Exemption.
<sup>1</sup> Equivalent is defined as achieving the same level (within 10%) of diesel particulate matter (PM) emissions reduction as a DPF.			

**ON-ROAD Compliance Options Protocol**

Protocol Step	Question(s)	Answer	Action
1	Is the on-road vehicle a concrete mixer or dump truck?	YES	Go to Step 2
		NO	Register equipment and obtain compliance verification. No further action required other than anti-idling compliance on job-site.
2	Is the vehicle required for an emergency? (including for underground equipment operators)	YES	Request Exemption
		NO	Go to Step 3
3	Is the vehicle powered by electricity or alternative (non-diesel) fuel?	YES	Register equipment and obtain compliance verification. No further action required other than anti-idling compliance on job-site.
	Is the diesel concrete mixer or dump truck 2007 or newer?	NO	Go to Step 4
4	Can the vehicle be repowered or retrofit with a CARB or EPA verified DPF or equivalent? <sup>1</sup>	YES	Repower or retrofit equipment and obtain compliance verification.
		NO	If it is currently 2023 or earlier <u>and</u> the vehicle owner is a DMWESB/SDVB firm, go to Step 5. If it is currently 2024 or later, go to Step 6.
5 (pre-2024)	Can the equipment/vehicle be retrofit with a CARB or EPA verified emissions control device other than DPF?	YES	Retrofit equipment with a CARB or EPA verified emission control device that maximizes diesel particulate matter emission reduction. Obtain compliance verification.
		NO	Go to Step 6
6	Is compliant rental equipment available within 100 miles of the job site?	YES	Rent equipment and obtain compliance verification.
		NO	Request Exemption.
<sup>1</sup> Equivalent is defined as achieving the same level (within 10%) of diesel particulate matter (PM) emissions reduction as a DPF.			

**Terms/Definitions**

**CARB:** California Air Resources Board, a state regulatory agency charged with regulating the air quality in California.

**Diesel Particulate Matter** – the solid or liquid particles found in the air released through the exhaust from diesel vehicles/equipment. Exposure to diesel particulate matter increases the risk of heart attack, stroke, cardiovascular disease, exacerbates asthma, and can lead to low-weight and pre-term births. Diesel particulate matter is also known as a human carcinogen as determined by the International Agency for Research on Cancer.

**DMWESB:** Disadvantaged, Minority, Women, or Emerging Small Business as certified by the State of Oregon Certification Office for Business Inclusion and Diversity

**DOC:** Diesel oxidation catalyst. A device designed to reduce harmful diesel emissions such as carbon monoxide, hydrocarbons and certain diesel particulate emissions.

**DPF:** Diesel particulate filter. A device designed to trap all diesel particulate matter above a certain size.

**Emission Control Device:** technology added to equipment to reduce harmful emissions. These may include catalytic converters and particulate filters, among other technologies.

**EPA:** U.S. Environmental Protection Agency, a federal regulatory agency charged with regulating the environment.

**EPA Nonroad Emission Ratings/Tiers**

Nonroad Diesel Emission Ratings (EPA)

Nonroad: Construction equipment and vehicles that fall under the EPA non-road engine equipment category, which includes all diesel equipment not intended for highway use. For the purpose of this policy, these vehicles/equipment include only diesel construction vehicles/equipment with engines larger than 25 horsepower, which includes tractors, excavators, dozers, scrapers and other construction vehicles/equipment.

SDVB: Service Disabled Veteran Business as certified by the State of Oregon Certification Office for Business Inclusion and Diversity.
