

↑ NORTH PORTLAND IN MOTION

N Lombard Main Street, St Johns

North Portland in Motion is a planning effort to identify transportation needs and investments to improve access to community destinations and support walking, biking, and transit use in the North Portland peninsula.

PLAN BACKGROUND & PURPOSE

The Portland Bureau of Transportation (PBOT) recognizes that North Portland is long overdue for a community-driven transportation plan.

This plan is an opportunity to convene the greater North Portland community to identify shared priorities and key opportunities for new investments to support better access to important places within the peninsula as well as better connections to Northeast Portland and the Central City.

Long transit travel times, an incomplete and insufficient biking network, unpaved streets and sidewalk gaps, and a lack of safe, accessible crossings pose challenges for North Portlanders in meeting their daily mobility needs. Many have shared that they feel that the neighborhoods served by this plan lack a complete and community supported vision for transportation investments, especially in the areas further into the peninsula.

PROJECT GOALS

Through North Portland in Motion, PBOT will:

- Engage deeply with North Portlanders to understand transportation needs and barriers to meeting daily mobility needs.
- Identify a near-term prioritized investment strategy of projects and programs to improve conditions for walking, biking, and transit.
- Build new relationships with community-based organizations to represent the diverse neighborhoods and communities within North Portland.

PROJECT AREA

North Portland in Motion will focus on the residential and commercial areas of North Portland west of Interstate 5. The North Portland in Motion study area is defined by both natural and human-made edges, including rivers, bluffs, highways, railroads, and industrial areas. The study area is home to seven neighborhoods, each with a unique and strong civic identity.

PROJECT TIMELINE

The project timeline is roughly two years, ending in the winter of 2022, with an anticipated final plan appearing before City Council in the early months of 2023. PBOT is deeply invested in elevating voices from North Portland's diverse communities, especially those who may have historically been not represented. The community will be engaged throughout the project timeline through a Community Advisory Group, partnerships with several Community Based Organizations, focus groups and workshops, online and in-person open houses, neighborhood walks and rides, and consultation with Neighborhood Associations and other civic organizations. Visit our project website, northportlandinmotion.com, to find ways you can get involved and engaged in making this plan.
