- 33.567.020 Where the Regulations Apply
- 33.567.040 Construction of Noise-Buffering Walls

Map 567-1 Powell Boulevard Plan District

33.567.010 Purpose

The regulations of the Powell Boulevard plan district are intended to buffer residences from the noise and traffic of Powell Boulevard. The regulations of this chapter support the intent of the highway improvements which widened Powell Boulevard and created public off-street parking. The Powell Boulevard Environmental Impact Statement required noise protection for the adjacent residential neighborhood.

33.567.020 Where the Regulations Apply

The regulations of this chapter apply to the Powell Boulevard plan district area. The boundaries of the plan district are shown on Map 567-1 at the end of this chapter, and on the Official Zoning Maps.

33.567.040 Construction of Noise-Buffering Walls

The construction of a noise-buffering wall is required for new development as follows:

- A. Location.** A wall is required along any lot line parallel to Powell Boulevard that abuts an R zone. A wall is also required on street lot lines that are across a local service street from an R zone. This regulation only applies to local service streets that are south of and parallel to Powell Boulevard. See Figure 567-1.
- B. Standards.** The wall must be solid, continuous, a minimum of 8 feet high, and extend the entire length of the lot line. The design of the wall must be compatible with the existing walls constructed by the State.
- C. Landscaping.** For walls along a street lot line, a 5 foot area landscaped to the L3 standard must be provided on the street side of the wall. The landscape standards are stated in Chapter 33.248, Landscaping and Screening. The landscaped area is intended to screen the wall from the residential area. See Figure 567-1.
- D. Buildings integrated into the wall.** Where a rear lot line abuts the rear lot line of a residential zone, a building with a height of no more than 10 feet may be integrated into the design of the wall.
