33.612.010 Purpose

This chapter contains the density and lot dimension standards for approval of a Preliminary Plan for a land division in the multi-dwelling and IR zones. These standards ensure that lots are consistent with the desired character of each zone. This chapter works in conjunction with other chapters of this Title to ensure that land divisions create lots that can support appropriate development and uses in accordance with the planned intensity of the zone.

33.612.020 Where These Standards Apply

The standards of this chapter apply to land divisions in the multi-dwelling and IR zones.

33.612.100 Density

- A. Single-dwelling development.** Except in the IR zone, when a house, attached house, duplex, attached duplex, triplex, or fourplex is proposed for some or all of the site, the applicant must show how the proposed lots can meet the minimum density stated in Chapter 33.120. Site area devoted to streets is subtracted from the total site area in order to calculate minimum density.
- B. All other development.** When development other than a house, attached houses, duplex, attached duplex, triplex, or fourplex is proposed, minimum density must be met at the time of development.

33.612.200 Lot Dimension Standards

- A. Purpose.** These standards ensure that:
 - Each lot has enough room for development that meets all the requirements of the zoning code;
 - Lots are an appropriate size and shape so that development on each lot can be oriented toward the street as much as possible.
 - The multi-dwelling zones can be developed to full potential; and
 - Housing goals for the City are met.
- B. Lot dimensions.**
 1. Lot dimensions for lots that will be developed with residential structures are stated in Table 612-1.
 2. Nonconforming uses. Minimum lot dimensions for lots with nonconforming uses are the same as those for houses.
