

33.651 Water Service

651

Sections:

- 33.651.010 Purpose
- 33.651.020 Water Service Standard

33.651.010 Purpose

Water service provides water for public health and emergency purpose, including fire suppression. These standards ensure that the public water system will serve each lot in the land division and, where appropriate, will extend through the land division to reach adjacent sites. They will result in an efficient, flexible water distribution system that can serve a variety of development configurations while minimizing overall development costs.

33.651.020 Water Service Standard

Water service must meet the standard of this section. Adjustments are prohibited.

- A. The Water Bureau or District and the Fire Bureau have verified that water facilities with adequate capacity and pressure are or will be available to serve the proposed development.
- B. The Water Bureau has verified that the land division will not eliminate the availability of services to existing development and the site will not move out of conformance with Water Bureau or District or Fire Bureau requirements for water service.
