

SW Broadway Drive Retaining Wall | PROJECT INFORMATION

Anticipated Start: June 21, 2016

End: August 2016

Purpose: To replace the distressed rubble wall with a new retaining wall

PROJECT DESCRIPTION

The goal of the Project is to replace a distressed rubble retaining wall that supports a small portion of SW Broadway Drive and an important water line. The existing wall will be replaced by a new one supported on deep foundations, designed for resilience to earthquakes and landslides. Concurrent with the retaining wall work, we will also make guardrail improvements in the project vicinity.

TEMPORARY TRAFFIC IMPACTS

Unfortunately, a road closure will be required to complete the retaining wall work. **SW Broadway Drive between SW Grant St and SW Vista will be closed to motorized vehicle traffic all hours and all days during the project duration** (see map on back). This section of roadway will remain open to local traffic only, up to the complete "hard" closure at the work zone. The closure will be approximately 350 feet long, near the property address 980 SW Broadway Drive. Motor vehicles will need to use alternate routes around the road closure.

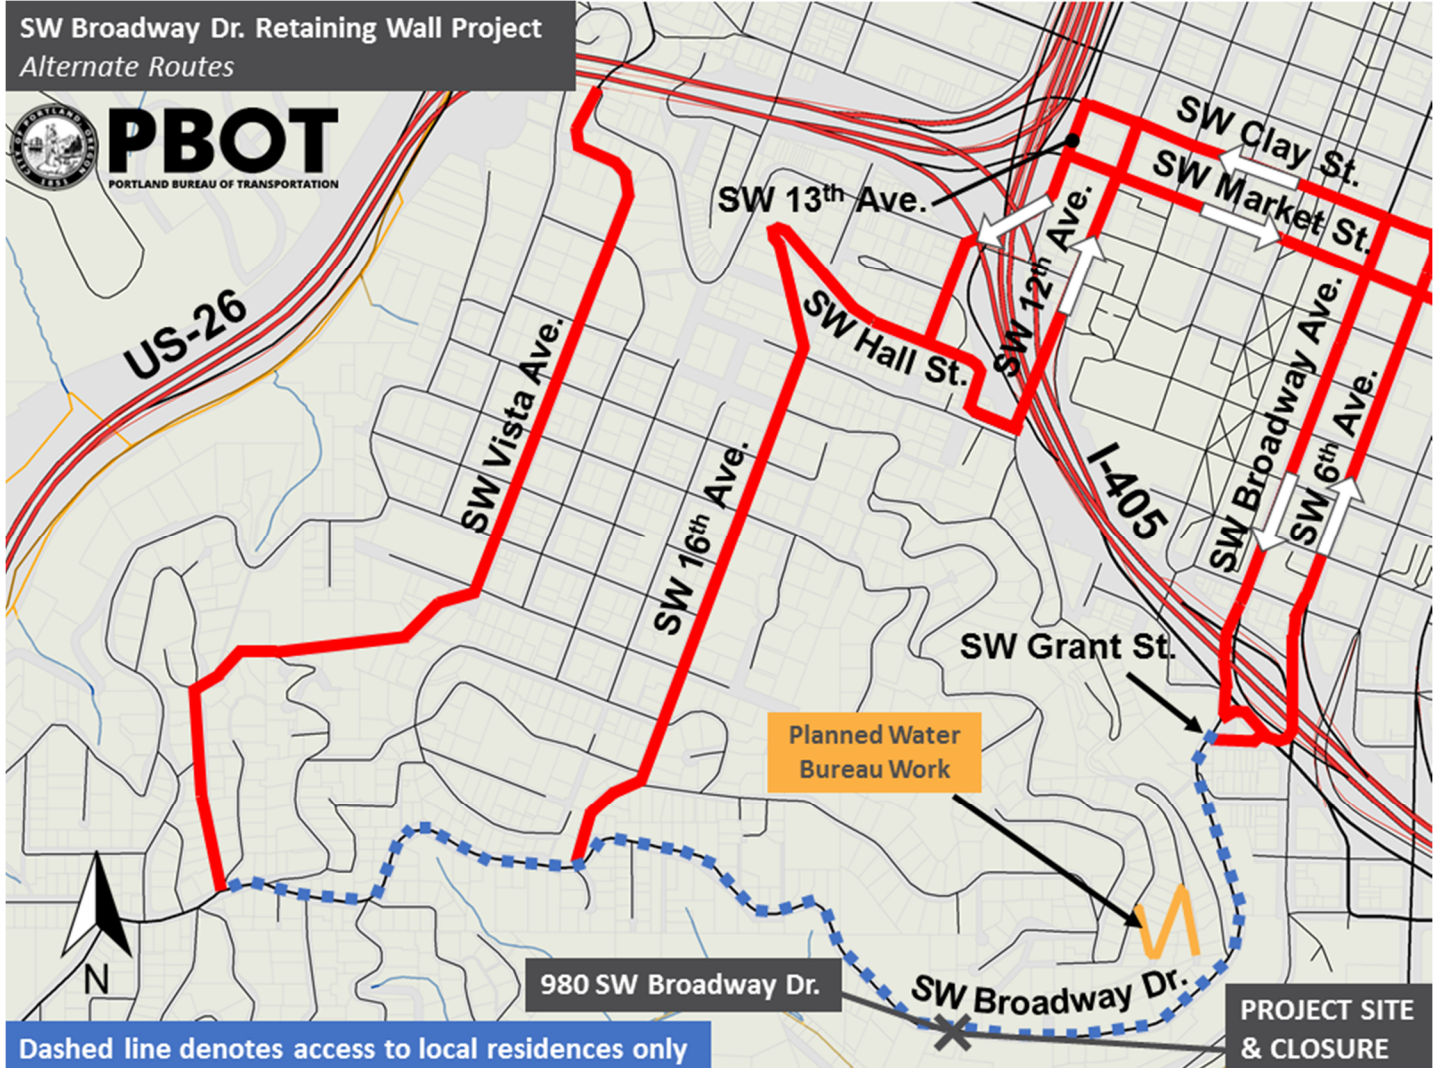

Fortunately, pedestrian and bicycle access through the site will be maintained. **A pedestrian and bicycle corridor will be provided along the north shoulder of the road through the project area.**
