

122ND AVENUE

REPAVING AND SAFETY IMPROVEMENTS

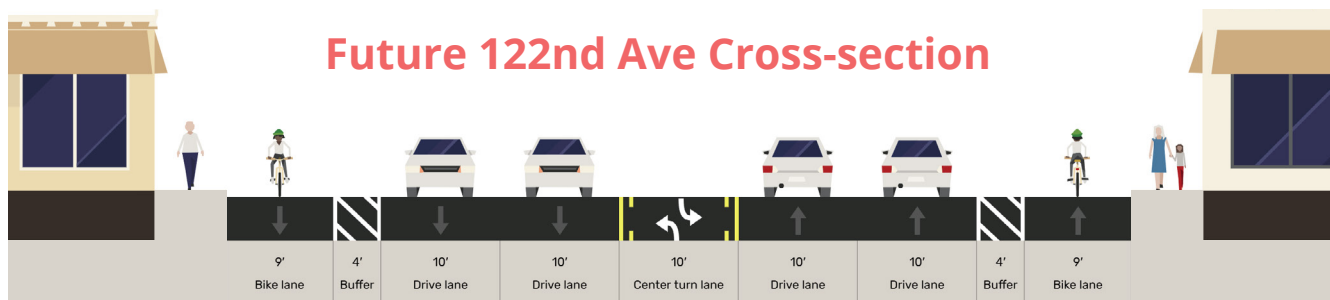

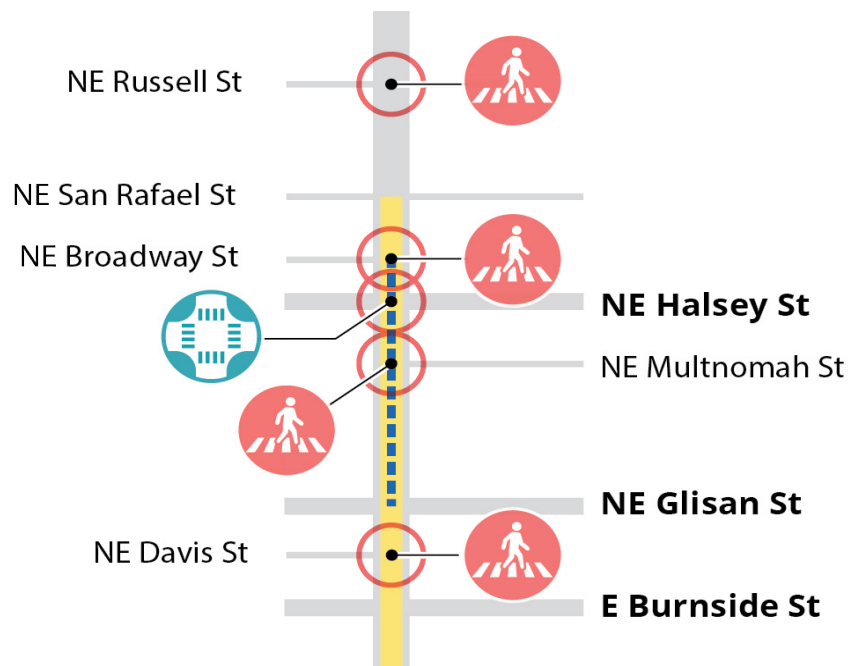

Project Description

In late summer 2025, PBOT will repave 122nd Avenue **between NE Glisan and NE Broadway**. The paving schedule aligned with other planned improvements at the Halsey intersection so combining the projects together is more efficient. The purpose of the project is to improve pavement conditions on 122nd as well as safety for all road users. The restriping will align with the vision outlined in the 122nd Avenue Plan completed in 2023.

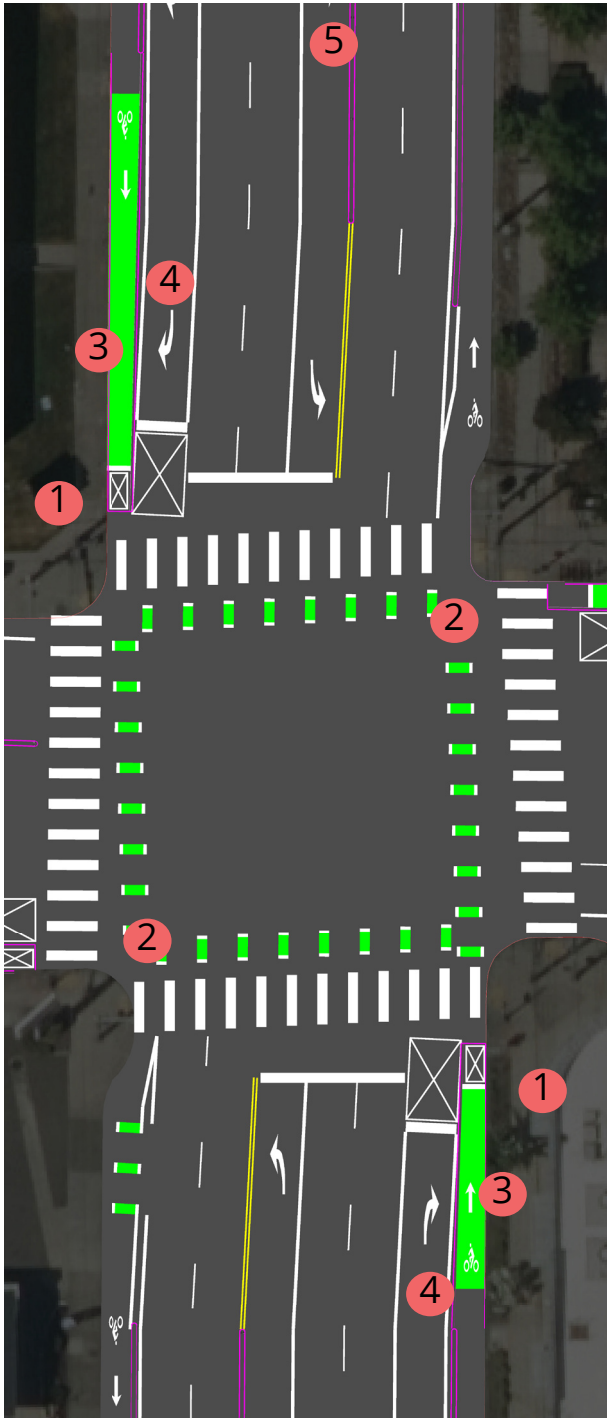

What changes are coming to 122nd Avenue?

-  Road resurfacing and enhanced bike lanes
-  Street Lighting
-  Intersection safety upgrade
-  New signalized crossings coming 2026

After repaving, 122nd between NE Glisan and NE Broadway will still have two ten foot travel lanes in each direction separated by a ten foot center turn lane. The parking lane will be converted to an 9 foot bike lane, with the current bike lane converted to a 4 foot buffer. The design will also include some medians and left turn restrictions as well as the removal of underutilized street parking to allow for the protected bike lanes.

NE Halsey Intersection Redesign

Intersection Elements

NE Halsey and 122nd Ave is a high crash intersection which has needed safety improvements for many years. Repaving is an opportunity to add new safety features that were identified in the 122nd Ave Plan.

Signal upgrades and timing changes to separate people walking and biking from right turning vehicles

New green painted bike crossing

Raised bike lanes at intersections

Restricting right turns on red lights to reduce conflicts between road users

Median and turn restrictions along 122nd
