10005	Portland	Portland	Pedestrian Network Completion Program	Citywide	Gaps and deficiencies in Portland's pedestrian network present significant barriers to pedestrians. Many of these can be remedied through modest expenditures to address the most critically needed improvements. These projects should contribute to an increase in safe walking as disincentives to usage are eliminated and the continuity of the pedestrian network is improved. Example projects include sidewalk gap infill, sidewalk improvements, safer shoulders, shared streets, pathways, trails, crossing improvements, wayfinding improvements, accessibility improvements, and signal modifications. The program will also work to identify and implement needed improvements in designated Pedestrian Districts.	\$60,200,000	Yes	Years 1 - 20
10006	Portland	Portland	Bikeway Network Completion Program	Citywide	Gaps and deficiencies in Portland's bikeway network present significant barriers to bicyclists. Many of these can be remedied through modest expenditures to address the most critically needed improvements. These projects should contribute to an increase in safe bicycling as disincentives to usage are eliminated and the continuity of the bikeway network is improved. Example projects include new bike lanes and sharrows, improvements to existing bikeways, wayfinding improvements, colored bike boxes and lanes, and signal modifications. This program will coordinate with paving projects to ensure that new striping designs are developed ahead of time and implemented in conjunction with paving. The program will also work to identify and implement needed improvements in designated Bicycle Districts.	\$24,000,000	Yes	Years 1 - 20
10007	Portland	Portland	Neighborhood Greenways Program	Citywide	The Neighborhood Greenway system provides a network of safe and comfortable pedestrian/bicycle priority routes on low-volume, low-speed streets. The Neighborhood Greenway network will be improved and expanded over time through inexpensive treatments that lower speeds, reduce automobile volumes, create safer crossings of busy streets, and provide wayfinding. Example project elements include speed bumps, sharrows, signage, diverters, curb ramps, lighting, and improved crossings.	\$19,500,000	Yes	Years 1 - 20
10008	Portland	Portland	High Crash Corridor Program	Citywide	High Crash Corridors are streets in Portland with a high concentration of crashes. The High Crash Corridor program uses relatively inexpensive education, enforcement and engineering solutions to address crash problems in a short period of time. Example projects include improved crossings, lane reorganizations, curb extensions, median islands, speed reader boards, and speed/crosswalk enforcement.	\$67,100,000	Yes	Years 1 - 20
10009	Portland	Portland	Safe Routes to School Program	Citywide	Portland Safe Routes to School is a partnership of the City of Portland, schools, neighborhoods, community organizations and agencies that advocates for and implements programs that make walking and biking around our neighborhoods and schools fun, easy, safe and healthy for all students and families while reducing our reliance on cars. The Portland Safe Routes to School program currently provides Education, Encouragement, Engineering, Enforcement, and Evaluation in an Equitable manner (6 'E's) to support students in schools to be safe, have fun, grow healthy and get there.	\$71,500,000	Yes	Years 1 - 20

Example projects include corridor signal timing, electronic message boards, variable speed limits, traveler information services, traffic cameras, bluetooth readers, and other intelligent transportation system (ITS) elements.	\$9,500,000	Yes	Years 1 - 20
10013	Portland	Portland	Transportation & Parking Demand Management Program	Citywide	Transportation & Parking Demand Management (TDM) seeks to better utilize existing capacity in the transportation system and parking supply by reducing single-occupant automobile trips through demand management strategies. This is achieved by encouraging people through education, outreach, incentives and pricing to choose other modes, share rides, travel outside peak times, and telecommute, among other methods. TDM program elements include SmartTrips outreach, TDM Plan requirements for new development, and parking management planning and implementation. TDM is often implemented in partnerships with community organizations, neighborhood and business associations, developers and property managers.	\$19,500,000	Yes	Years 1 - 20

Ideally, these design treatments would be concurrent with stormwater improvements. Example projects include "shared street" improvements to gravel streets, new connections through undeveloped rights-of-way, and improvements to substandard paved streets. The program could be funded by a combination of Local Improvement Districts, development impact fees, local transportation funds (e.g. Our Streets), Bureau of Environmental Services (BES) stormwater funds, and other grant and community investment opportunities.	\$20,000,000	Yes	Years 1 - 20
