Topic or Description	Executive Sedan, Shuttle van designation
How is this impacting your industry?	The designation makes it difficult for companies to expand because of the additional cost involved both from PBOT and PDX when the vehicles all do pretty much provide the same service.
Reason for consideration or change to the regulation?	The cost is inhibiting growth. Most importantly it is fueling no permitted vehicles operating on Portland
Proposed solution:	Once a company is permitted they should be able to add vehicles regardless if they are a van, mini van, suv or sedan and not have to start an new company.
