<b>Topic or Description</b>	The ability to issue and display permit decals on taxi vehicles
<b>How is this impacting your industry?</b>	Traditional Taxi plates require rivets to mount them to the vehicle. When removed, the car is left with two to four small holes causing exposure to the elements and may resale value if not repaired.
<b>Reason for consideration or change to the regulation?</b>	Further, reduce damage to taxi vehicles permitted by the city and increase the vehicles' resale value when a company chooses to remove a car from their fleet.
<b>Proposed solution:</b>	Revise Portland City Code to include "or permit decal" where ever "taxi plate" is mentioned.
