Topic or Description	Proof of Insurance - Paper or Electronic
How is this impacting your industry?	Every permitted driver is required to carry liability insurance. An electronic copy of the driver's policy, via the drivers insurance company's official mobile application, should be acceptable proof of insurance.
Reason for consideration or change to the regulation?	Today, digital proof of a driver's insurance policy is acceptable almost everywhere.
Proposed solution:	Revise City Code to Accept proof of insurance in a digital format via the mobile app or paper copy.
