Topic or Description	Requirement for Companies to Decertify Drivers
How is this impacting your industry?	City Code requires companies to certify drivers that provide service for them.
Reason for consideration or change to the regulation?	Although it is implied that a company should "decertify" a driver when the driver/company relationship has been terminated, the code is completely silent regarding this matter
Proposed solution:	Revise code to require all companies to decertify drivers immediately after the driver/company has terminated the relationship.
