Topic or Description	No Longer Require First Aid Kit and Fire Extinguisher
How is this impacting your industry?	Some drivers are required to carry these items as a condition of their contract or agreement with the company they drive for.
Reason for consideration or change to the regulation?	It is extremely rare for a driver to administer first aid or extinguish a fire while driving private for-hire. In most cases, first-responders are called to deal with the emergency. For some drivers, having to provide this extra equipment at their expense is a financial burden.
Proposed solution:	Remove this requirement from City Code making it optional for drivers and companies.
