Topic or description of issue:

Taxi camera system

How is this impacting your industry?

We are the supplier for taxi camera system model V2HD. We discontinued that model and released new model G2. We need the model G2 to be approved by the regulator.

Reason to change the regulations?

Need interpretation on the requirement "store digital records is safe and inaccessible by unauthorized users"

Proposed solution:

Digital records (memory card) is secured with security locking method to protect accessible by unauthorized user
