Topic or description of issue:

Driving for multiple companies and platforms presents a risk of exceeding maximum driving limits.

How is this impacting your industry?

In some instances, drivers are driving over 12 hours in a 24 hour period. They are able to cross this safety threshold when driving for more than one company.

Reason to change the regulations?

Increase safety to the riding public

Proposed solution:

Limit the amount of companies/platforms, the driver can drive for at one time.
