

Bicycling tips Consejos para pasear en bicicleta

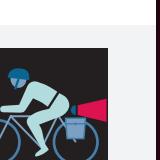

Obey all signs and traffic lights
People on bicycles, like other vehicle operators, must obey traffic regulations. Never ride against traffic.

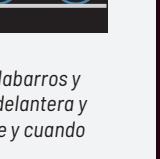

Avoid road hazards
Watch for sewer grates, slippery manhole covers, oily pavement, gravel and ice. Cross railroad tracks at right angles. For better control as you move across bumps and other hazards, stand up on your pedals.

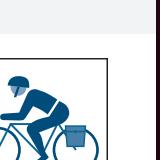

Evide los peligros de la carretera
Esté atento a las rejillas de alcantarillado, tapas de registro resbaladizas, pavimento aceitoso, grava y hielo. Cruce las vías del ferrocarril perpendicular. Para un mejor control al desplazarse por baches y otros peligros, póngase de pie sobre las pedales.

Ride a well-equipped bike
Outfit your bike with a good lock, tool kit, fenders and bike bags. You are required to use a strong head-light and rear reflector (a blinking red light is better) at night and when visibility is poor.

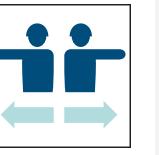

Maneje una bicicleta bien equipada
Equípese su bicicleta con un buen candado, kit de herramientas, guardabarros y bolsos para bicicletas. Usted está obligado a utilizar una luz blanca delantera y un reflector trasero (una luz roja intermitente es mejor) por la noche y cuando haya poca visibilidad.

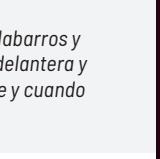

Use hand signals

Hand signals tell motorists what you intend to do. For turn signals, point in the direction of your turn. Signal as a matter of courtesy and safety and as required by law.

Use the señales con la mano

Los señales con la mano indican a los automóviles lo que va a hacer. Para las señales de giro, señale la dirección en la que va a girar. Haga señales como una cuestión de cortesía y seguridad y tal como exige la ley.

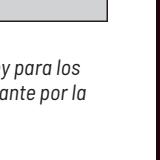

Ride consistently

Ride as close as practical to the right. Exceptions: when traveling at the normal speed of traffic, avoiding hazardous conditions, preparing to make a left turn or using a one-way street.

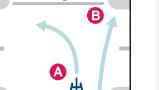

Pasee en bicicleta conscientemente

Vaya lo más cerca de la derecha como sea práctica. Excepciones: cuando se desplace a la velocidad normal del tráfico, al evitar situaciones peligrosas, cuando se prepara para hacer un giro a la izquierda o cuando va por una calle de un solo sentido.

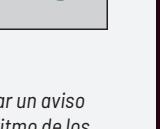

Choose the best way to turn left

There are two ways to make a left turn: ① Like an auto: look back, signal, move into the left lane, and turn left. ② Like a pedestrian: ride straight to the far-side crosswalk, then walk your bike across, or queue up in the traffic lane.

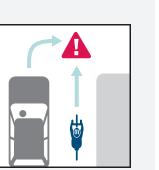

Elija la mejor manera de girar a la izquierda

Hay dos maneras para girar a la izquierda: ① Como un automóvil: mirar hacia atrás, señalizar, pasar al carril izquierdo y girar a la izquierda. ② Como un peatón: dirigirse recto hasta el extremo del cruce de peatones, luego cruzar caminando con la bicicleta y hacer cola en el carril de circulación.

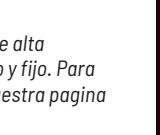

Use caution when passing

Motorists may not see you on their right, so stay out of the driver's "blind spot." Be very careful when overtaking cars while in a bike lane; drivers don't always signal when turning. Some other smart things to be alert for: car doors opening and cars pulling out from side streets or driveways.

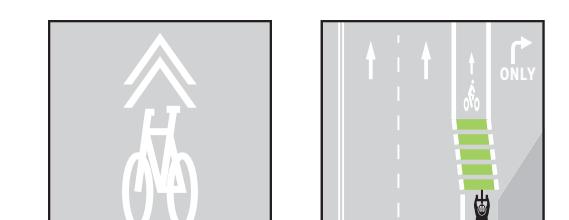

Tenga cuidado al adelantar

Los conductores no ven su bicicleta a su derecha, por lo que manténgase fuera del punto ciego del conductor. Tenga mucho cuidado al adelantar automóviles estando en un carril bici; los conductores no siempre señalan al girar. Algunas otras cosas a las que estar alerta: puertas de autos que se abren y autos que salen de las calles laterales o caminos de entrada.

Bicycle symbols & markings

Las señalizaciones y marcas para bicicletas

Sharrows

Sharrows designate a safe and visible place to ride. Follow the sharrows to connect low-train Neighborhood Greenway streets throughout the city.

Dashed bike lane

Watch for turning vehicles or buses making stops. The dashed lines mean a mix of traffic can use the space.

Bike-specific signal detectors

Position your wheels over the lines of the marking and stay there to activate the sensor and 'get the green.' If a car is already waiting, it will activate the signal for you.

Bike box

Roll up to the front of the line when there's a yellow or red light. If the light is green, watch for vehicles turning right before continuing through the intersection.

Left turn bike boxes

Use these boxes to make left turns across intersections rather than merging into traffic. Roll your bike into the box and position it to cross the intersection. Wait for the signal and move through the intersection ahead of auto traffic.

End bike theft

Always use a high quality U-lock, or other high-security lock. Lock the frame and the front wheel to a secure, fixed object. For more information on securing your bicycle, visit our website at EndBikeTheft.org.

Asegure su bicicleta

Utilice siempre un candado tipo U de alta calidad, u otra cerradura de alta seguridad. Asegure el cuadro y la rueda delantera a un objeto seguro y fijo. Para obtener más información sobre cómo proteger su bicicleta, visite nuestra página web en EndBikeTheft.org.

When you bike:

Sharrows designate a safe and visible place to ride. Follow the sharrows to connect low-train Neighborhood Greenway streets throughout the city.

Al montar en bicicleta:

Los sharrows designan un lugar seguro y visible donde conducir. Siga las flechas dobles para conectar con las calles de Neighborhood Greenway por toda la ciudad.

When you drive:

Keep an eye out for all types of travel — bikes, pedestrians, skateboarders, etc. Drive slowly and give ample room when passing.

Cuando conduzca:

Manténgase alerta de todos los tipos de transporte — bicicletas, peatones, patinetas, etc. Conduzca despacio y proporcione un amplio espacio al pasar.

When you cycle:

Watch for cyclists going straight through when crossing dashed bike lanes.

Al pedalear:

Be aware of cyclists taking the lane to trigger traffic signals using their designated signal detector.

When you walk:

Stop behind the white line at a yellow or red light. When the light turns green, yield to cyclists in the bike lane before turning. Only cyclists can take a right on red when there's a bike box.

Al caminar:

Like a bike box, these smaller boxes guide bikes to use a predictable route through busy intersections. Be alert to bicyclists using them.

When you cycle:

Stop behind the white line at a yellow or red light. When the light turns green, yield to cyclists in the bike lane before turning. Only cyclists can take a right on red when there's a bike box.
