| 1 | I do not, I feel motion sensoring would/could be most appropriate. | 4/7/2020 3:58 PM |
| 2 | All lighting needs to shine down and not towards the neighbors | 4/7/2020 3:50 PM |
| 3 | The Lake Oswego facility is primarily self contained units with lighting matching a residential setting. The tour presentation demonstrated the unmuted use of lighting in an area less inhabited than the proposed site. The document showing a night illumination from Dodge Park was misleading in it's position to the site and was of a pre-existing facility prior to the construction of most homes in the area. It also is bordered by intersecting streets, an electrical station and existing large pine trees. | 4/7/2020 2:59 PM |

| 1 | Build low to mitigate light and noise and contain any leaks from system | 4/7/2020 3:50 PM |
| 2 | In all public communications PWB has been less than forth coming on actual design and pre-construction preparations and design decisions. I would much prefer a frank conversation to allow for a fresh perspective, potential mitigation resolution and potential new ideas to improve the process. You need not always expect confrontation, but perhaps a dose of realism and new perspective, as this is happening in our backyards regardless of any other design decisions made. | 4/7/2020 2:59 PM |
